

AI ✦ Powered

Recruitment Intelligence

AI that handles sourcing, screening, and matching, so your recruiters spend their day with candidates, not spreadsheets, while running entirely on our own secure, on-premise GPU infrastructure.

On-Premise Dedicated GPUs

Intelligent Screening

Quick Shortlist

IMS Group's internally built
AI-powered Recruitment
Intelligence Platform.

Designed to accelerate the hiring
funnel by enabling recruiters
with informed decision making.

One platform, multiple toolkits, and the *underlying method*

People Possible AI – The Core Intelligence Engine

FLAGSHIP PLATFORM

Figures reflect our own measured deployment across
sourcing and screening activity. Results vary by desk,
role mix and process maturity.

The Recruitment Toolkit

STANDALONE TOOLS

Five tools that take the mechanical work off a
recruiter's desk. No integrations, no configuration, no
rollout programme. Open one, get what you need,
close it.

The Business Operations Toolkit

STANDALONE TOOLS

Tools for the documents, policies and conversations
that slow an operation down. Grounded in your own
material rather than general knowledge, and running
where your sensitive documents can safely go.

DELTA

THE IMS FRAMEWORK

Evidence-led AI readiness, task by task, revealing
where automation adds value, where human
judgement matters, and what comes next.

INDUSTRIES WE SERVE

Built for the people responsible for hiring

Recruitment Agencies

More capacity, faster candidate delivery

Staffing Organisations

Scale without proportional admin growth

Executive Search Firms

Deeper research, judgement preserved

Internal TA Teams

Faster, more informed hiring decisions

Recruitment Ops Leaders

Efficiency, visibility, and compliance

Workforce Transformation Leaders

Responsible AI, governance intact

Our Impact

BEFORE

6.5 hrs*

per recruiter per day — sourcing,
screening, matching, preparation

AFTER

2.5 hrs

with People Possible AI running
underneath

3–4 hrs

of savings measured
across real-world
recruitment scenarios,
without relying on in-house
recruitment teams.

*Based on internal testing across selected real-world recruitment scenarios.
Results may vary depending on role, hiring volume and workflow

Security-first Infrastructure

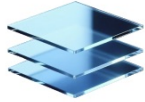

Your data never leaves
our secure network

Zero data retention
and no model training

GDPR
aligned

Auditable
outputs

On-Premise
GPUs
